

Convertible Bench Tables

Convertible Bench Tables manufactured by Dheensay offer superior quality and versatility.

These tables offer the flexibility and ease of operation as well as being mobile at the same time for storage

and usage. These tables offer solutions for venues that adapt and change at will in the shortest moment of time without heavy labour.

3 - 2 - 1, Unfold to create your desired requirement

Unfolding these Convertible Bench Tables gives you 2 options to suit your needs.

Bench Set Up

Allows Occupants to be seated in a Theatre Style Seating in Cafeterias or even in Churches

Cafeteria / Canteens

With table tops unfolded, these tables may now be used in Canteens or Cafeterias for Dining / Food Breaks. Tables may be linked to face each other for a larger set up in Canteens & Cafeterias.

Classrooms

Table tops unfolded, these tables may be also used for Educational purposes as well in classrooms or studying purposes

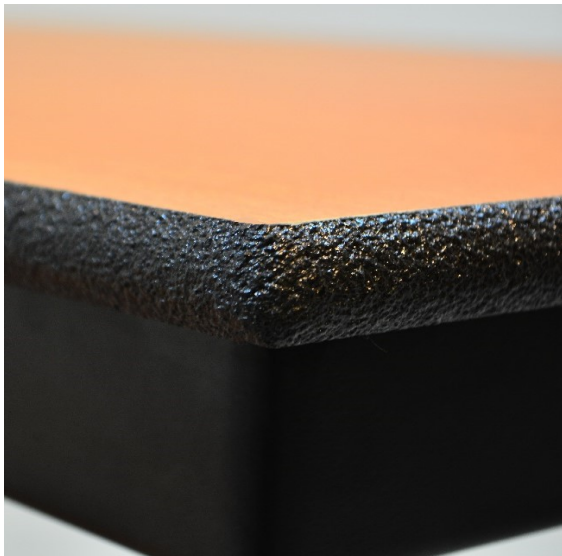

Whatever your needs may be, or even for all the above, these tables serve for multiple applications quickly, swiftly and efficiently.

Convertible Bench Tables are available as well further in 3 different heights for Children, Primary and Adult Sizes.

LARVA Edge

Our tables come standard with Plywood Tops and Vinyl Edges. As an Option, our newly developed LARVA Edge is available to meet International needs better. These edges are the most durable edges, robust, hygienic and water resistant. LARVA Edge is available in standard Black or Grey upon request. A long lasting solution to inferior table edges such as ABS that may warp table tops with moisture penetration.

***** LARVA Edge is available at additional cost**

Durability

Our frames are made with a variety of tubings that are robust and durable. Rather than focusing on lightness, we at Dheensay prefer the old fashion way of providing the best qualities available to us for a better long lasting product. Black Pipe Tubing becomes the solution to our table frames.

Brakes

75mm Round Rubberized Wheels are friendly on all surfaces for a smoother glide across floors such as cement rendered or tile floors. All wheels swivel tables for better manouverability and place tables firmly in place with brakes. This prevents further movement of tables in any position be it for Bench Seating purposes or Dining or Educational purposes in Cafeterias or Classrooms

Flexibility

Convertible Bench Tables are also the friendliest solution to venues that require quick transformation of space without the need of specially skilled labour. A staff of 2 may set up up to 50 tables / 150 persons seating in 15 - 20 minutes to your set up required. ***
